WORDS OF WELCOME

Welcome to the 11th European Colorectal Congress

Dear colleagues,

it is a great pleasure to welcoming you to the **11th European Colorectal Congress (ECC)** from **4 to 7 Dec 2017** in **St.Gallen, Switzerland**.

The key topic of this year's European Colorectal Congress (ECC) will be rectal cancer. The aim of this Symposium is to show the importance of anatomy, pathology and modern diagnostics for strategic decision making when it comes to choosing the right therapy.

Internationally renowned Experts will discuss with the plenum the importance of surgery, with regard to modern neoadjuvant therapy, for small or locally advanced carcinoma in the future. These innovative treatment approaches may also give rise to new challenges and strategies. Prevention and the treatment of complications, especially of anastomotic leaks, will, of course, be discussed.

As in the past a **Masterclass** in Colorectal Surgery preceded the congress.

We hope to have set up an interesting programme for this year's ECC and we look forward to exciting discussions.

Best regards,
